WHY ONLINE BACKUP?

- TOTALLY AUTOMATIC.
- SET AND FORGET.
- NO CAPITAL COST.
- FROM \$1 PER MONTH.
- KIWI SUPPORT.
- KNOWLEDGABLE STAFF.

CASE STUDIES

Case #1. Small business – backing up 0.25 GB accounting software onto USB. This was replaced by a Worry Free online backup solution for **\$1/month.**

Case #2. Legal Firm – The client was replacing their tape drive solution that had a five day retention.

| | |
|---|-----------------------|
| Tape Drive | \$1,500 |
| Five Tapes | \$270 |
| Yearly backup software license | \$300 |
| Engineering labour | \$150 |
| Total Cost | <u>\$2,220</u> |

Worry Free provided a back-up solution with a 30 day retention period for the cost of the yearly backup software license: **\$25/month.** There was no capital outlay or requirement for the daily tape maintenance.

Case #3. Processing Plant with 100+ employees – The client was having tape drive reliability and capacity issues on a one tape rotation basis. Worry Free implemented a 10 day retention period with 30 GB of data for **\$30/month.**

The Worry Free Online Backup solution costs a small fraction of traditional methods, and unlike legacy solutions, your backup storage can be incrementally increased as required. Worry Free backups are easy to install and manage: you can forget about backup drudgery and your valuable data will be protected with state of the art encryption software.

flexible solutions for your business needs

WHAT DOES ONLINE BACKUP HAVE OVER LEGACY SOLUTIONS?

Traditional backup solutions for small businesses require a new tape drive every few years. This capital expenditure ranges from about \$1,000 to over \$3,000. Engineering time, new tapes and staff training typically doubles the cost. On top of this there are 3rd party backup programs annual maintenance fees. With Worry Free Online Backup Solution you will never have to buy another tape drive, additional tapes, backup software and the fees that go with the programs. Forget about the daily drudgery of changing tapes, checking for tape errors and taking and storing tapes off site. Your data will be stored and protected in our corporate state of the art data centre. Incorporating top of the line UPS's with extended battery backup, redundant power and standby generator. Also our software offers the option to backup to a local device/drive.

With us you can be rest assured that you will be Worry Free.
